CONTENTS

VOLUME 96 NUMBER 1 JANUARY 1983

Review

1 **R. M. Steinman, I. S. Mellman, W. A. Muller, and Z. A Cohn.** Endocytosis and the recycling of plasma membrane

Regular Articles

29 **W. A. Muller, R. M. Steinman, and Z. A. Cohn.** The membrane proteins of the vacuolar system. III. Further studies on the composition and recycling of endocytic vacuole membrane in cultured macrophages

37 **E. Schmid, D. L. Schiller, C. Grund, J. Stadler, and W. W. Franke.** Tissue type-specific expression of intermediate filament proteins in a cultured epithelial cell line from bovine mammary gland

51 **P. Maupin and T. D. Pollard.** Improved preservation and staining of HeLa cell actin filaments, clathrin-coated membranes, and other cytoplasmic structures by tannic acid-glutaraldehyde-saponin fixation

63 **K. S. Stenn, J. A. Madri, T. Tinghitella, and V. P. Terranova.** Multiple mechanisms of dissociated epidermal cell spreading

68 **R. E. Stephens.** Reconstitution of ciliary membranes containing tubulin

76 **L. A. Greene, R. K. H. Liem, and M. L. Shelanski.** Regulation of a high molecular weight microtubule-associated protein in PC12 cells by nerve growth factor

84 **W. C. Earnshaw and U. K. Laemmli.** Architecture of metaphase chromosomes and chromosome scaffolds

94 **J. M. Collins and K. A. Foster.** Differentiation of promyelocytic (HL-60) cells into mature granulocytes: mitochondrial-specific rhodamine 123 fluorescence

100 **L. Traeger and M. A. Goldstein.** Thin filaments are not of uniform length in rat skeletal muscle

104 **P. S. Amenta, C. C. Clark, and A. Martinez-Hernandez.** Deposition of fibronectin and laminin in the basement membrane of the rat parietal yolk sac immunohistochemical and biosynthetic studies

112 **J. Laterra, J. E. Silbert, and L. A. Culp.** Cell surface heparan sulfate mediates some adhesive responses to glycosaminoglycan-binding matrices, including fibronectin

124 **T. F. Linsenmayer, J. M. Fitch, T. M. Schmid, N. B. Zak, E. Gibney, R D. Sanderson, and R. Mayne.** Monoclonal antibodies against chick type V collagen: production, specificity, and use for immunocytochemical localization in embryonic cornea and other organs

133 **P. F. Pilch, M. A. Shia, R. J. J. Benson, and R. E. Fine.** Coated vesicles participate in the receptor-mediated endocytosis of insulin

139 **H. Baumann, E. Hou, and G. P. Jahreis.** Preferential degradation of the terminal carbohydrate moiety of membrane glycoproteins in rat hepatoma cells and after transfer to the membranes of mouse fibroblasts

151 **J. W. Wojcieszyn, R. A. Schlegel, K. Lumley-Sapanski, and K. A. Jacobson.** Studies on the mechanism of polyethylene glycol-mediated cell fusion using fluorescent membrane and cytoplasmic cytoplasmic probes

160 **S. J. Sung, R. S. Nelson, and S. C. Silverstein.** Yeast mannans inhibit binding and phagocytosis of zymosan by mouse peritoneal macrophages

167 **T. N. Wight and V. C. Hascall.** Proteoglycans in primate arteries. III. Characterization of the proteoglycans synthesized by arterial smooth muscle cells in culture

177 **J. R. Couchman, M. Höök, D. A. Rees, and R. Timpl.** Adhesion, growth, and matrix production by fibroblasts on laminin substrates

184 **E. Skutelsky and E. A. Bayer.** Cell type-related aggregation of surface galactosyl-containing components at an early developmental stage in hemopoietic bone marrow cells in the rabbit

191 **H. Sudo, H. Kodama, Y. Amagai, S. Yamamoto, and S. Kasai.** In vitro differentiation and calcification in a new clonal osteogenic cell line derived from newborn mouse calvaria

199 **H. Sugino and F. Matsumura.** Fragmin induces tension reduction of actomyosin threads in the presence of micromolar levels of Ca^{2+}

204 **T. S. Baker, D. L. D. Caspar, C. J. Hollingshead, and D. A. Goodenough.** Gap junction structures. IV. Asymmetric fractures revealed by low-irradiation microscopy.

217 **A. L. Hubbard, D. A. Wall, and A. Ma.** Isolation of rat hepatocyte plasma membranes. I. Presence of the three major domains

230 **A. L. Hubbard and A. Ma.** Isolation of rat hepatocyte plasma membranes. II. Identification of membrane-associated cytoskeletal proteins

240 **D. V. Sinicropi and D. L McIlwain.** Changes in the amounts of cytoskeletal proteins within the perikarya and axons of regenerating frog motoneurons

248 **B. Schmidt, B. Hennig, R. Zimmermann, and W. Neupert.** Biosynthetic pathway of mitochondrial ATPase subunit 9 in *Neurospora crassa*

256 **C. R. Brown, K. I. von Glos, and R. Jones.** Changes in plasma membrane glycoproteins of rat spermatozoa during maturation in the epididymis

265 **K.-R. Peters and G. E. Palade.** Fine structure of a periciliary ridge complex of frog retinal rod cells revealed by ultrahigh resolution scanning electron microscopy

Rapid Communications

277 **O. W. Petersen and B. van Deurs.** Serial-section analysis of coated pits and vesicles involved in adsorptive pinocytosis in cultured fibroblasts

282 **R. Bar-Shavit, A. Kahn, J. W. Fenton II, and G. D. Wilner.** Chemotactic response of monocytes to thrombin

286 **J. M. Velazquez, S. Sonoda, G. Bugaisky, and S. Lindquist.** Is the major *Drosophila* heat shock protein present in cells that have not been heat shocked?

291 **S. H. Barondes, D. N. Cooper, and P. L. Haywood-Reid.** Discoidin I and discoidin II are localized differently in developing *Dictyostelium discoideum*

297 **F. C. Reinach, T. Masaki, and D. A. Fischman.** Characterization of the C-proteins from posterior latissimus dorsi muscle of the adult chicken: heterogeneity within single sarcomeres

301 **R. J. Wang, W. Wissinger, E. J. King, and G. Wang.** Studies on cell division in mammalian cells. VII. A temperature-sensitive cell line abnormal in centriole separation and chromosome movement

307 CORRECTIONS

VOLUME 96 Number 2 FEBRUARY 1983

Regular Articles

321 **R. H. Gomer and E. Lazarides.** Switching of filamin polypeptides during myogenesis in vitro

330 **S. P. Banks-Schlegel and P. M. Howley.** Differentiation of human epidermal cells transformed by SV40

338 **T. McGarry, R. Hough, S. Rogers, and M. Rechsteiner.** Intracellular distribution and degradation of immunoglobulin G and immunoglobulin G fragments injected into HeLa cells

347 **P. J. M. Van Haastert and P. R. Van der Heijden.** Excitation, adaptation, and deadaptation of the cAMP-mediated response in *Dictyostelium discoideum*

354 **M. C. Beckerle and K. R. Porter.** Analysis of the role of microtubules and actin in erythrophore intracellular motility

363 **P. C. Bridgman and Y. Nakajima.** Distribution of filipin-sterol complexes on cultured muscle cells: cell-substratum contact areas associated with acetylcholine receptor clusters

373 **J. H. LaVail, I. K. Sugino, and D. M. McDonald.** Localization of axonally transported ^{125}I-wheat germ agglutinin beneath the plasma membrane of chick retinal ganglion cells

382 **R. M. Senior, G. L. Griffin, J. S. Huang, D. A. Walz, and T. F. Deuel.** Chemotactic activity of platelet alpha granule proteins for fibroblasts

386 **W. Nijhof and P. K. Wierenga.** Isolation and characterization of the erythroid progenitor cell: CFU-E

393 **Y.-J. Kim, J. Shuman, M. Sette, and A. Przybyla.** Arsenate induces stress proteins in cultured rat myoblasts

401 **W. Ip, S. I. Danto, and D. A. Fischman.** Detection of desmin-containing intermediate filaments in cultured muscle and nonmuscle cells by immunoelectron microscopy

409 **J. C. Gasson and S. Bourgeois.** A new determinant of glucocorticoid sensitivity in lymphoid cell lines

416 **R. Bravo, S. J. Fey, P. M. Larsen, N. Coppard, and J. E. Celis.** Proteins IEF (Isoelectric Focusing) 31 and IEF 46 are keratin-type components of the intermediate-sized filaments: keratins of various human cultured epithelial cells

424 **J. G. Izant, J. A. Weatherbee, and J. R. McIntosh.** A microtubule-associated protein antigen unique to mitotic spindle microtubules in PtK_1 cells

435 **M. Yamaguchi, R. M. Robson, and M. H. Stromer.** Evidence for actin involvement in cardiac Z-lines and Z-line analogues

443 **R. C. Carlin, D. C. Bartelt, and P. Siekevitz.** Identification of fodrin as a major calmodulin-binding protein in postsynaptic density preparations

449 **K. Porrello, W. Z. Cande, and B. Burnside.** *N*-Ethylmaleimide-modified subfragment-1 and heavy meromyosin inhibit reactivated contraction in motile models of retinal cones

455 **M. Marsh, E. Bolzau, J. White, and A. Helenius.** Interaction of Semliki Forest virus spike glycoprotein rosettes and vesicles with cultured cells

462 **R. A. Rovasio, A. Delouvee, K. M. Yamada, R. Timpl, and J. P. Thiery.** Neural crest cell migration: requirements for exogenous fibronectin and high cell density

474 **J. M. Gardner and D. M. Fambrough.** Fibronectin expression during myogenesis

486 **D. R. Soll and L. H. Mitchell.** Filament ring formation in the dimorphic yeast *Candida albicans*

494 **M. W. Klymkowsky, R. H. Miller, and E. B. Lane.** Morphology, behavior, and interaction of cultured epithelial cells after the antibody-induced disruption of keratin filament organization

510 **E. Spooncer, J. T. Gallagher, F. Krizsa, and T. M. Dexter.** Regulation of haemopoiesis in long-term bone marrow cultures. IV. Glycosaminoglycan synthesis and the stimulation of haemopoiesis by β-D-xylosides

515 **R. Ryo, A. Nakeff, S. S. Huang, M. Ginsberg, and T. F. Deuel.** New synthesis of a platelet-specific protein: platelet factor 4 synthesis in a megakaryocyte-enriched rabbit bone marrow culture system

521 **C. E. Lloyd and M. Ascoli.** On the mechanisms involved in the regulation of the cell-surface receptors for human choriogonadotropin and mouse epidermal growth factor in cultured Leydig tumor cells

527 **J. Molè-Bajer and A. S. Bajer.** Action of taxol on mitosis: modification of microtubule arrangements and function of the mitotic spindle in *Haemanthus* endosperm

541 **P. Novick and R. Schekman.** Export of major cell surface proteins is blocked in yeast secretory mutants

548 **R. J. Leslie and J. D. Pickett-Heaps.** Ultraviolet microbeam irradiations of mitotic diatoms: investigation of spindle elongation

562 **K. Wuang and R. Ramirez-Mitchell.** A network of transverse and longitudinal intermediate filaments is associated with sarcomeres of adult vertebrate skeletal muscle

Rapid Communications

571 **P. N. Rao and K. L. Satya-Prakash.** Inducers of DNA synthesis: levels higher in transformed cells than in normal cells

577 **K. W. Lanks and E. J. Kasambalides.** Dexamethasone induces gelsolin synthesis and altered morphology in L929 cells

583 CORRECTION

VOLUME 96 NUMBER 3 MARCH 1983

Regular Articles

589 **W. J. Snell, A. Clausell, and W. S. Moore.** Flagellar adhesion in *Chlamydomonas* induces synthesis of two high molecular weight cell surface proteins

598 **S. N. Wolniak, P. K. Hepler, and W. T. Jackson.** Ionic changes in the mitotic apparatus at the metaphase/anaphase transition

606 **D. R. Pitelka and B. N. Taggart.** Mechanical tension induces lateral movement of intramembrane components of the tight junction: studies on mouse mammary cells in culture

613 **D. R. Pitelka, B. N. Taggart, and S. T. Hamamoto.** Effects of extracellular calcium depletion on membrane topography and occluding junctions of mammary epithelial cells in culture

625 **D. L. Paul and D. A. Goodenough.** Preparation, characterization, and localization of antisera against bovine MP26, an integral protein from lens fiber plasma membrane

633 **D. L. Paul and D. A. Goodenough.** In vitro synthesis and membrane insertion of bovine MP26, an integral protein from lens fiber plasma membrane

639 **B. Ecarot-Charrier, F. H. Glorieux, M. van der Rest, and G. Pereira.** Osteoblasts isolated from mouse calvaria initiate matrix mineralization in culture

644 **M. Merion and W. S. Sly.** The role of intermediate vesicles in the adsorptive endocytosis and transport of ligand to lysosomes by human fibroblasts

651 **D. Banerjee and C. M. Redman.** Biosynthesis of high density lipoprotein by chicken liver: nature of nascent intracellular high density lipoprotein

661 **E. A. G. Chernoff, G. A. Maresh, and L. A. Culp.** Isolation and characterization of a large, neurite-associated glycoconjugate from neuroblastoma cells

669 **K. A. Johnson and J. S. Wall.** Structure and molecular weight of the dynein ATPase

679 **D. F. Bowen-Pope, P. E. DiCorleto, and R. Ross.** Interactions between the receptors for platelet-derived growth factor and epidermal growth factor

684 **N. J. Crisona and R. C. Strohman.** Inhibition of contraction of cultured muscle fibers results in increased turnover of myofibrillar proteins but not of intermediate-filament proteins

693 **E. B. Griepp, W. J. Dolan, E. S. Robbins, and D. D. Sabatini.** Participation of plasma membrane proteins in the formation of tight junctions by cultured epithelial cells

703 **V.-P. Lehto and I. Virtanen.** Immunolocalization of a novel, cytoskeleton-associated polypeptide of M_r 230,000 daltons (p230)

717 **B. W. Baer and R. D. Kornberg.** The protein responsible for the repeating structure of cytoplasmic poly(A)-ribonucleoprotein

722 **L. M. Stoolman and S. D. Rosen.** A possible role for cell-surface carbohydrate-binding molecules in lymphocyte recirculation

730 **G. A. Nelson, M. L. Andrews, and M. J. Karnovsky.** Control of erythrocyte shape by calmodulin

736 **M. T. Crow, P. S. Olson, and F. E. Stockdale.** Myosin light-chain expression during avian muscle development

745 **D. W. Easter, J. B. Wade, and J. L. Boyer.** Structural integrity of hepatocyte tight junctions

750 **P. A. Amato, E. R. Unanue, and D. L. Taylor.** Distribution of actin in spreading macrophages: a comparative study on living and fixed cells

762 **L. C. McConlogue, L. J. Marton, and P. Coffino.** Growth regulatory effects of cyclic AMP and polyamine depletion are dissociable in cultured mouse lymphoma cells

768 **J. C. Pinder and W. B. Gratzer.** Structural and dynamic states of actin in the erythrocyte

776 **C. Sato, R. Kuriyama, and K. Nishizawa.** Microtubule-organizing centers abnormal in number, structure, and nucleating activity in x-irradiated mammalian cells

783 **F. S. Fay, K. Fujiwara, D. D. Rees, and K. E. Fogarty.** Distribution of α-actinin in single isolated smooth muscle cells

796 **C. Ince, D. L. Ypey, R. van Furth, and A. A. Verveen.** Estimation of the membrane potential of cultured macrophages from the fast potential transient upon microelectrode entry

802 **S. Miyata and T. Akazawa.** Biosynthesis of rice seed α-amylase: proteolytic processing and glycosylation of precursor polypeptides by microsomes

807 **L. G. Tilney and J. C. Saunders.** Actin filaments, stereocilia, and hair cells of the bird cochlea. I. Length, number, width, and distribution of stereocilia of each hair cell are related to the position of the hair cell on the cochlea

822 **L. G. Tilney, E. H. Egelman, D. J. DeRosier, and J. C. Saunders.** Actin filaments, stereocilia, and hair cells of the bird cochlea. II. Packing of actin filaments in the stereocilia and in the cuticular plate and what happens to the organization when the stereocilia are bent

835 **G. Griffiths, P. Quinn, and G. Warren.** Dissection of the Golgi complex. I. Monensin inhibits the transport of viral membrane proteins from *medial* to *trans* Golgi cisternae in baby hamster kidney cells infected with Semliki Forest virus

851 **P. Quinn, G. Griffiths, and G. Warren.** Dissection of the Golgi complex. II. Density separation of specific Golgi functions in virally infected cells treated with monensin

857 **S. Yumura and Y. Fukui.** Pseudopodelike projections induced with dimethyl sulfoxide and their relevance to cellular polarity in *Dictyostelium*

866 **E. Rodriguez-Boulan, K. T. Paskiet, and D. D. Sabatini.** Assembly of enveloped viruses in Modin-Darby canine kidney cells: polarized budding from single attached cells and from clusters of cells in suspension

875 **J. J. M. Bergeron, L. Resch, R. Rachubinski, B. A. Patel, and B. I. Posner.** Effect of colchicine on internalization of prolactin in female rat liver: an in vivo radioautographic study

887 **I. S. Mellman, H. Plutner, R. M. Steinman, J. C. Unkeless, and Z. A. Cohn.** Internalization and degradation of macrophage Fc receptors during receptor-mediated phagocytosis

896 **D. G. Capco and S. Penman.** Mitotic architecture of the cell: the filament networks of the nucleus and cytoplasm

Rapid Communications

907 **H. Ronne, C. Ocklind, K. Wiman, L. Rask, B. Öbrink, and P. A. Peterson.** Ligand-dependent regulation of intracellular protein transport: effect of vitamin A on the secretion of the retinol-binding protein

911 **F. M. Brodsky, N. J. Holmes, and P. Parham.** Tropomyosin-like properties of clathrin light chains allow a rapid, high-yield purification

915 **M. Natowicz, D. W. Hallett, C. Frier, M. Chi, P. H. Schlesinger, and J. U. Baenziger.** Recognition and receptor-mediated uptake of phosphorylated high mannose-type oligosaccharides by cultured human fibroblasts

920 **P. Liesi, D. Dahl, and A. Vaheri.** Laminin is produced by early rat astrocytes in primary culture

925 CORRECTIONS

941 ASCB PUBLIC SERVICE NOTICES

VOLUME 96 NUMBER 4 APRIL 1983

Regular Articles

949 **M. J. Becich, M. Bendayan, and J. K. Reddy.** Intracellular transport and storage of secretory proteins in relation to cytodifferentiation in neoplastic pancreatic acinar cells

961 **J. W. Sanger, J. M. Sanger, and B. M. Jockusch.** Differences in the stress fibers between fibroblasts and epithelial cells

970 **R. L. Moss, G. G. Giulian, and M. L. Greaser.** Effects of EDTA treatment upon the protein subunit composition and mechanical properties of mammalian single skeletal muscle fibers

979 **I. Nemhauser, J. Joseph-Silverstein, and W. D. Cohen.** Centrioles as microtubule-organizing centers for marginal bands of molluscan erythrocytes

990 **D. Schubert, M. LaCorbiere, F. G. Klier, and C. Birdwell.** A role for adherons in neural retina cell adhesion

999 **R. Bollini, A. Vitale, and M. J. Chrispeels.** In vivo and in vitro processing of seed reserve protein in the endoplasmic reticulum: evidence for two glycosylation steps

1008 **R. D. Mitchell, P. Palade, and S. Fleischer.** Purification of morphologically intact triad structures from skeletal muscle

1017 **R. D. Mitchell, A. Saito, P. Palade, and S. Fleischer.** Morphology of isolated triads

1030 **W. J. Brown, W. A. Shannon, Jr., and W. J. Snell.** Specific and azurophilic granules from rabbit polymorphonuclear leukocytes. I. Isolation and characterization of membrane and content subfractions

1040 **W. J. Brown, W. A. Shannon, Jr., and W. J. Snell.** Specific and azurophilic granules from rabbit polymorphonuclear leukocytes. II. Cell surface localization of granule membrane and content proteins before and after degranulation

1047 **S. W. de Laat, L. G. J. Tertoolen, P. T. van der Saag, and J. G. Bluemink.** Quantitative analysis of modulations in numerical and lateral distribution of intramembrane particles during the cell cycle of neuroblastoma cells

1056 **T. W. McKeithan, P. A. Lefebvre, C. D. Silflow, and J. L. Rosenbaum.** Multiple forms of tubulin in *Polytomella* and *Chlamydomonas*: evidence for a precursor of flagellar α-tubulin

1064 **A. R. Robbins, S. S. Peng, and J. L. Marshall.** Mutant Chinese hamster ovary pleiotropically defective in receptor-mediated endocytosis

1072 **R. S. Garofalo, D. M. Gilligan, and B. H. Satir.** Calmodulin antagonists inhibit secretion in *Paramecium*

1082 **R. Y. Hampton and R. W. Holz.** Effects of changes in osmolality on the stability and function of cultured chromaffin cells and the possible role of osmotic forces in exocytosis

1089 **S. L. Schor, T. D. Allen, and B. Winn.** Lymphocyte migration into three-dimensional collagen matrices: a quantitative study

1097 **E. M. Bonder and M. S. Mooseker.** Direct electron microscopic visualization of barbed end capping and filament cutting by intestinal microvillar 95-k dalton protein (villin): a new actin assembly assay using the *Limulus* acrosomal process

1108 **R. H. Glass, J. Aggeler, A. Spindle, R. A. Pedersen, and Z. Werb.** Degradation of extracellular matrix by mouse trophoblast outgrowths: a model for implantation

1117 **H. M. Kronenberg, B. J. Fennick, and T. J. Vasicek.** Transport and cleavage of bacterial pre-β-lactamase by mammalian microsomes

1120 **J. P. Langmore and J. R. Paulson.** Low angle x-ray diffraction studies of chromatin structure in vivo and in isolated nuclei and metaphase chromosomes

1132 **J. R. Paulson and J. P. Langmore.** Low angle x-ray diffraction studies of HeLa metaphase chromosomes: the effects of histone phosphorylation and chromosome isolation procedure

1138 **C. V. Dang, D. C. H. Yang, and T. D. Pollard.** Association of methionyl-tRNA synthetase with detergent-insoluble components of the rough endoplasmic reticulum

Rapid Communications

1149 **R. L. Pardue, G. W. Perry, R. C. Brady, and J. R. Dedman.** Production of monoclonal antibodies against calmodulin by in vitro immunization of spleen cells

1155 **B. R. Oakley and N. R. Morris.** A mutation in *Aspergillus nidulans* that blocks the transition from interphase to prophase

1159 **D. M. Gardiner and R. D. Grey.** Membrane junctions in *Xenopus* eggs: their distribution suggests a role in calcium regulation

1164 **S. D. Glacy.** Pattern and time course of rhodamine-actin incorporation in cardiac myocytes

1168 **C. Ocklind, U. Forsum, and B. Öbrink.** Cell surface localization and tissue distribution of a hepatocyte cell-cell adhesion glycoprotein (cell-CAM 105)

1172 **M. Chambard, B. Verrier, J. Gabrion, and J. Mauchamp.** Polarization of thyroid cells in culture: evidence for the basolateral localization of the iodide "pump" and of the thyroid-stimulating hormone receptor–adenyl cyclase complex

1179 CORRECTION

INFORMATION FOR SUBSCRIBERS

SUBSCRIPTIONS—The basic subscription price per year (two volumes, six issues each) for institutions and individuals is $250. Students are eligible for the reduced rate of $125. Members of The American Society for Cell Biology may obtain the Journal for $100 through the Society (addressed to Dr. Robert L. Trelstad, Secretary, The American Society for Cell Biology, 9650 Rockville Pike, Bethesda, MD 20814). (Please add $32 for airmail surcharge to all European subscriptions.) Single copies are sold at $21. Subscriptions, payable in advance, start with the first issue of the calendar year.

Payments and *inquiries* about membership in the American Society for Cell Biology should be addressed to Dr. Robert L. Trelstad, Secretary, The American Society for Cell Biology, 9650 Rockville Pike, Bethesda, MD 20814.

All other inquiries about subscriptions and back issues should be addressed to the Order Service of The Rockefeller University Press, 1230 York Avenue, New York 10021.

Remittances should be made by check or money order payable to The Rockefeller University Press and addressed to Post Office Box 5108, Church Street Station, New York 10249. All checks *must* be drawn on U. S. banks.

Claims for nonreceipt of issues will be honored when received within 3 months of mailing for U. S. A. subscribers, 6 months for foreign subscribers.

MICROFORM—Subscriptions and back copies from Vol. 1 on, are available in microfiche and microfilm through University Microfilms, 300 North Zeeb Road, Ann Arbor, MI 48106.
